News Notes

"DANCE TEAM" TONIGHT

Wm. Stewart left for Lethbridge on Tuesday's bus where he has work for the summer months.

Byron Tanner and Ellis Heninger were in Raymond on Monday of this week on a real estate deal.

The biggest 25c you ever spent—See "DANCE TEAM" TONIGHT

R. A. VanOrman and Byron Vance were in Taber and Barnwell on Saturday and Sunday last.

Jas. S. Anderson and S. I. May were speakers at the Magrath Second Ward on Sunday night, filling a returned Missionary appointment.

Genealogical programs were held in several wards of the Stake Sunday night, and interesting and instructive programs were given.

H. P. Tanner of Magrath was a visitor at the Raymond Second Ward Sacrament Meeting on Sunday night last.

Mrs. A. Erickson returned to Raymond Monday evening, after spending the past two years or so in Utah. She will spend some time here with relatives.

Miss Ethel Heninger of Calgary returned to Calgary Tuesday of this week, after several days visiting in the district with relatives.

Two of the nicest days of the spring were Sunday and Monday, when the sun was out in all its glory and the air warm and very pleasant.

Showers fell on Sunday night being real heavy in places, and spotted all over the district. Along the road from Magrath in one place the barrow pits were nearly full and a little farther on there was hardly any water on the road.

Mr. and Mrs. Gordon Brewerton were here on Monday, returning home from Lethbridge where they took Barbara to have her leg put in a plaster cast following a bruise of some time ago when she was playing. It is thought the leg will recover without any further trouble.

"Guilty Hands" is showing at the Capitol Theatre next week. This is a picture that will grip your interest from beginning to end. It has been our pleasure to see the show and for interest, and good acting it is highly commendable. See what the father does to save his daughter, from a man whom the father knows better by far than does the girl. What would you do? See the picture, then decide.

The first boat to come to Churchill this summer will arrive early in August, prepared to take to Europe the first shipment of cattle to go out of the Dominion over the northern route according to recent reports from Manitoba's agent. Preparations for the shipment are now under way and everything will be set for the epoch-making shipment by the end of July.

According to a report of the United States commerce department, open days of United States motor tourists in the Dominion in 1931 were only 7 percent less than in the previous year and 12.7 percent less than in the peak year of 1929. Automobiles coming north in '31 numbered 4,909, 930, and their occupants spent \$188, 660,000. The interchange of tourists is one in which Canada has much the better of it. The decline in number of tourists has been about the same other way. But Canadians are spending much less proportionately. In 1931, American expenditures in Canada were estimated at \$233,758,000 while Canadians spent \$59,902,000 in the United States. The tourists credit balance in Canada's favor has declined only about \$20,000,000 from the 200,000,000 peak of 1929. The net balance was \$179,675,000 in 1929; \$201,154,000 in 1928; \$199,431, 000 in 1930, and \$181,856,000 in 1931.

J. E. Day Passes On

Elisha Day, aged and respected citizen of Raymond for many years, passed away Wednesday afternoon in the hospital at Lethbridge, following a spell of sickness which attacked him last Saturday.

He and his wife have both been alling all winter, and about three weeks ago the children were sent for, and visited with the aged couple for some time, having just returned home when the fatal attack came upon Mr. Day. He was feeling pretty well last Saturday and went out to the yards to do the chores, and when he failed to return they looked for him and found him unconscious on the ground. He was rushed to the hospital at Lethbridge but never rallied, and passed away as above stated.

Several months ago he had a partial stroke, and this returned Saturday and coupled with internal trouble was the cause of death. Funeral will be held Friday at 4 p.m. at the home.

The sympathy of the community goes out to Mrs. Day and the family in their loss, and especially to the wife, who is herself practically helpless as far as getting around is concerned.

Literary Society Meets

The Ladies Literary Society held their May meeting at the home of Lilian C. Roberts, Friday May 27th. The book reviewed was Selma Lagerlofs "Gesta Berling" presented by Mrs. Louella B. Taylor. "The Story of Gesta Berling", Miss Lagerlofs first novel, won for her immediate recognition in the literary world. It is the epic of Varmland, where a love and a struggle of music, and a temperament easily provoked to a laughing oblation of life's harshness, characterizes the folk. Here Gesta Berling one of the most haunting characters in fiction leads the heedless cavaliers of Elsie in their mad pranks. And it is here that Gesta comes upon the vision which brings about his own regeneration and the rehabilitation of Elsie. It is generally conceded that "The Story of Gesta Berling" more than any other single work, won for Miss Lagerlofs the Nobel Prize. In this volume Miss Lagerlofs shows her love and loyalty to her home, people and country. The next meeting of the Society will be held at the home of Mrs. Fanny Walker, June 24th, when Mrs. Lottie Knight will review "The Life of Napoleon" by Emil Ludvig.

Monthly Priesthood Meeting Is Held

The monthly Priesthood and Stake Board Meetings were held on Sunday last, and with the splendid weather prevailing, all were well attended. This was the first meeting for three or four months when the roads had been passable so that all wards had their first usual representation present.

In the main assembly the first item of business was to complete the organization of the Y.L.M.I.A. presidency of the Stake. Miss Velma Meldrum chose as her two councillors Mrs. Retta Walton as first, and Mrs. Angelina Witbeck second. There were 9 young men presented for ordination to the office of Elders, six of them being from the Magrath 2nd Ward.

Pres. O. H. Snow and Pres. J. W. Evans both spoke on Tithing, the former stressing the need of our paying it so that the Church can carry on its projects at home and abroad such as Temple building and Temple

work. Missionary work, building of chapels, etc. He also urged its payment as a source of blessings that can be obtained in no other way. Pres. Evans spoke of the many blessings that are promised the faithful (the payer, and stated that when we are in need of these blessings as we are now, that it seemed only natural that we should be honest with the Lord in this matter.

President H. S. Allen was the concluding speaker and mentioned the accomplishments of some of the L. D. S. Men of Utah in the field of politics and public service, and referred to the prophecy that the fate of the government of the United States would hang on a thread, and that the L.D.S. Church would be appealed to save it. In mentioning the accomplishments of Reed Smoot, J. Reuben Clark and others, the speaker observed that such a prophecy could quite easily be fulfilled in natural ways if occasion should require.

Crop Conditions and the Weather

Crops throughout the district were looking exceptionally good at the week-end. Wheat was showing a good healthy stand, and the earlier crops were standing nicely and covering the ground in splendid shape. It has been years since the prospects for a bumper crop have been as good as they are at present. The hay and pasture lands never looked better. The abundant moisture and cool weather has brought the grass and hay on wonderfully, and every place where a blade of grass can grow it is green, and keeps right on coming up fresh after being eaten off. There is no shortage of feed for stock now that the grass is growing so well.

Peet fields show a practically 100 per cent stand and look healthy as can be seen. Thinning was going on in a number of fields prior to the storm, but some of the beets are just breaking through, the rows hardly being full from one end to the other. Superintendent Frank Taylor states that

the wet spell will be a big benefit to some fields where the ground had crusted, as it will break the crust and give the young beets a chance to get up. As it is now that the webworm moths are laying their eggs, the moisture will help too, as they do not like wet weather and wet fields to lay eggs in. Cut worm damage to date has been negligible, and the wet weather will help to keep this menace down until the beets are a better size. Unless the wet weather holds out for some time, it will be a big help to the beets.

The weather has been wet since Monday, and Wednesday the sun did not show his face at all. The ground is full of moisture and if we could get warm weather now for a couple of weeks, the gardens and field crops of all kinds would fairly jump. We will not complain of the rain, but just hope for dry warm weather for awhile.

Our Mail Bag

TO THE PUBLIC

We are very desirous that the School grounds and Provincial Government Farm function most effectively to the benefit of the district at large. To this end we wish to extend an invitation to organized groups as well as individuals to visit us.

In extending this invitation we wish to assure you that we are only too glad to use the services of the available staff to conduct visitors about and to give any information or help possible. It must be pointed out however, that as far as the school is concerned we are reduced to one man who is consequently greatly overtaxed in keeping up the grounds. It need scarcely be pointed out that the cooperation of the public will greatly assist Mr. Burnett in maintaining the beauty of these surroundings of which we feel justly proud.

Unfortunately in the past, due to misunderstanding or sheer disregard for others rights there has been a certain amount of vandalism which we can in no sense condone. In order that there be no further misunderstanding as to the rights of the public in connection with this institution the following regulations have been prepared.

1. Small children unless in the company of responsible adults will not be allowed on the school grounds or about the farm buildings. This regulation is made mainly to protect children against accidents as in the past they have often been found playing on the driveways, amongst the livestock and in other unsafe places.

2. Visits to the grounds are not to be made after 9 p.m. and to the farm buildings after 6 p.m. unless under direction of an employee of the institution.

3. If an organization wishes to use the grounds for picnics or other functions arrangements should be made previously and preparations made for its accommodation. In connection with this regulation it will be understood that the lawns cannot be used immediately following heavy rains or an irrigation. It is also requested that care be taken to clean up paper waste food and other debris after such functions.

4. Lawns are not to be used for softball or other sports unless permission be given by the officer in charge.

5. The picking of flowers, fruit, the handling or mutilation of plants, is strictly forbidden. In this connection we would ask that entering of beds or plantings be avoided.

6. Visits to the garden and orchard must be made under the direction of an employee.

7. School children and other pedestrians who commonly use the premises, will hereafter keep to lanes and fence rows. Promiscuous crossing of fields will not be tolerated.

Any wilful infringement of these regulations will be considered as trespassing and will be dealt with accordingly.

These regulations are not made to discourage the use of this institution, but as much in the best interests of the general public as in our own.

Again we solicit your co-operation and assure you that we are here to serve the public as best we can at any and all times.

Provincial School of Agriculture,
Per C. O. ASPLUND,
Officer in Charge.

BRITISH WOMEN VISIT CANADA

British women, taking practical interest in the Empire, are to visit Canada to see & learn for themselves something of life and business in the Dominion. Sailing on July 30, a party of university and professional women and girl students will leave on a unique educational tour arranged by the Canadian National Railways in co-operation with the Canadian Steamship Company, which will enable them at specially low cost to combine a transatlantic holiday with a study of educational, agricultural, industrial and commercial aspect of Canada. Advantage is being taken of the all-inclusive rate covering transportation by sea and land, hotels, meals and sight seeing trips for one month's tour.

News Notes

"DANCE TEAM" TONIGHT

Misses Sara King and Iris Jones, and Mrs. T. O. King were Lethbridge visitors on Monday of this week.

Nine people were drowned in Canada over the week-end in boating accidents. Three of them were Albertans.

The biggest 25c you ever spent—See "DANCE TEAM" TONIGHT

Thursday found rain still falling although the clouds had thinned out a great deal.

Byron Vance is moving into the house next to T. W. Meldrum's and has been busy the past week renovating it and papering.

The Federal Government at Washington passed a bill calling for a highway expenditure of \$219,000,000 for this year.

Bruening, Chancellor, of Germany has resigned, and with him his Cabinet. It is expected that the Conservative group in the Reichstag will be asked to form a government.

Edmonton was reached from Toronto in 19 1/2 hours of flying over the week-end by Geoffrey O'Brien, who brought out a Puss Moth Plane for George Ross, of St. Kilda, Alberta's flying cattleman.

The regular Board of Trade meeting will be held Monday night, June 6. Important business in connection with the Stampede will be discussed and all members are urged to attend.

F. Albrecht and Co. one of the old cotton broker firms in England was posted on the Stock Exchange Wednesday as unable to meet their liabilities due on Thursday.

Fred D. Gowdy, 28, of Hamilton ran amok with a repeating shotgun on Wednesday and killed his father in law, his brother in law, and then committed suicide with the same weapon.

Edward F. Swift, Sr., chairman of Swift and Co., one of the world's largest packing concerns, committed suicide on Saturday at 9 a.m. when he jumped from the window of his sixth storey apartment. His financial affairs were in good condition, and his health at the age of 64 was given as the cause for his rash act.

According to news despatches twenty-two pitches for horseshoes have been laid out in Toronto, and the vogue is sweeping across Canada. The Lethbridge Herald suggests that it be taken up in Lethbridge as a pastime and that its economy feature, should recommend it to everyone in these times. Why not have it here.

At the home of Mrs. Henry Anderson on the first day of June a delightful Birthday party was held, in honor of her daughter Mildred being her eleventh birthday. There were twenty boy and girls present and a most enjoyable time was had by all after which ice cream and cake were served.

40 Daredevil racers started in the 500 mile race at the Indianapolis Speedway on Monday which was won by Wilbur Shaw of Indianapolis, who covered the course at a speed of 164.441 miles per hour. Several smash ups occurred, and Billy Arnold, the winner of the 1930 race was taken to hospital following the wrecking of his car when it left the track and went through the fence.

RECEIPTS?

W. Paul of Blackfoot, Alberta, has a ewe that raised three lambs last June and in nine months less than a year she had two more. Another ewe had two lambs last year and raised them. This year she had three which makes five in less than two months. All of which is more or less the reason for the head on this note.

WHERE TO SPEND AN ENJOYABLE VACATION

Canada This Year

Since the annual vacation has become a definite part of modern life, the decision as to where it will be spent is of considerable importance. Canada has a particular appeal to the vacationist, for it has an unusual variety of attractions, which may be enjoyed at reasonably cost.

RECREATION AREAS EASILY accessible. For most people, the summer vacation is limited to a few weeks and is really shortened by the time used in travelling to and from the locality selected. Canada has an extensive system of good roads and excellent railway service, which greatly facilitates travel between provinces.

ATTRACTIVE COVER WIDE

RANGE
Canada presents a striking diversity of natural features—the rugged Atlantic coast; the St. Lawrence river and Great Lakes, the world's great inland waterway; the Laurentian mountains, land of forest and stream; the prairies; the majestic Rockies; and the beautiful Pacific Coast. Each of these areas has its own attractions of scenic beauty and opportunities for enjoyable recreation. Fishing, hunting, camping, canoeing, and mountain climbing may all be enjoyed under ideal conditions, while golf and tennis may be played practically everywhere. Accommodation includes everything from camp site to luxurious hotel.

Various hotel. These to whom economy is a matter of concern may spend a pleasant vacation close to nature, at surprisingly small cost.

TRAVEL INFORMATION GLADLY FURNISHED

The National Development Bureau, Department of the Interior, at Ottawa, has prepared a series of automobile road maps, showing the main routes from one province to another, also a number of interesting booklets, including "Vacations in Canada" which describe the tourist attractions of each province. These will be sent to any of our readers planning a vacation. Applicants should state the area in which they are interested.

THE GOLDEN RULE

During the past week or so in Raymond pilfering and petty larceny have been having an innings. Three tires & rims have been stolen off cars and two cars taken for joy-riding apparently, and one of them left on the road deserted because there was not enough gas in it to finish the trip.

What is the idea back of these pranks, and why couldn't we create a sentiment that would curb these practices in our town? There is nothing gained by it. In the first place articles that are taken such as these have been and are always a cause of worry because of the fear of being found out. One cannot have a clear conscience, and without this there is no joy in life. Then too, in connection with car stealing, it is seldom that the one who borrows without asking are not found out, and always if apprehended the fine and costs amount to much more than the cost of a similar car ride would have been in a hired or properly borrowed car. There must be a great thrill in doing these things, or they would cease.

We are howling about high taxes, and yet we believe we would be safe in saying that when it was all counted up we pay more for our judiciary system in Canada than for any other one thing. It is a sure thing that if these highly salaried officials could be dispensed with, or put on part time, that our tax bills could be reduced a great deal.

Well, what is the solution? The Golden Rule of the Master would go a long way toward solving these troubles. We have all departed far from the idea of doing unto others as you would that others should do unto you. And in its stead we have supplemented the idea of doing the other fellow before he does you, and because of this attitude we have to have police officers, police magistrates, judges, jurors, lawyers, and what not. Because we have little or no confidence in our fellowman. There was a time when these disputes would be settled by arbitration, but today for one case that is arbitrated, there are ninety-nine go thru the courts, and after all in many cases that money could have been saved, better feelings preserved and as much justice meted out as in the courts of the land.

This is no casuistry of the judiciary. We have full confidence in them and their decisions, and respect them in their offices. But there is no doubt but that many of the cases aired in court, if taken at the commencement could have been arbitrated and settled peaceably, and we doubt if there are many of the magistrates and judges who have any particular liking for the sentences they have to pass out and who would not rather have disputes settled out of the court rooms.

One or two individuals cannot make much headway at stamping out this spirit of freedom in appropriating other people's goods. But a community effort could come very nearly killing it. There are many things that could be tried out. For one, if the proper sentiment existed, we could try for awhile talking to our neighbor and his family, instead of talking about them. The latter is always easier, and under existing conditions sometimes a great deal safer, because many of us resent any suggestions from the outside and interpret them in the wrong way. Then again, we could resolve to be our brother's keeper a little more, and help check on each other and each other's families. We do not favor the gossip and tale bearer, but it would be different entirely if we really tried to do a good turn in our visits instead of just gossiping.

Acts of vandalism and petty larceny are not the fruits of a moment's thought, but rather a climax to a series of smaller and rather insignificant things that may have appeared rather smart and pert at the time. We have said many times that "The devil is the devil's workshop," and in view of what takes place in our midst occasionally, it seems that every father and mother, along with teaching their children right things, owe it to the child to see that there is some kind of useful employment for his leisure hours, and that his mind is occupied with something useful, then mischief will not hatch so

readily.

These items are not exactly the kind we like to mention. But the repetition of these acts of law-breaking are not very good advertising for the town either, and if we could do something to start a crusade that would result in helping all of us to a higher plane in the observance of the Golden Rule, then it would be worth all the condemnation that this article will bring upon us.

Think it over. Talk after you have really considered the matter, and then see that you have something to talk about.

The only known place in the world at the present time in urgent need of more dwellings is reported in Netherlands East Indies. The construction of 400 houses was started a few weeks ago as a forerunner of an extensive house-building program.

Here and There

Anticipations are that there will be an attendance of 500 Romanians at the district convention to be held at the Cornwallis Inn, Kentville, N.S., June 1 and 2. It is expected that Sir John Bennett, of St. John's, Newfoundland, will address the convention.

Hon. Gordon S. Harrington, premier of Nova Scotia, accompanied by Mrs. Harrington, left Halifax recently for Montreal where they boarded S.S. Princess of Bedford for a short holiday in the Old Country. During his absence, Hon. Percy C. Black will be acting premier of the province.

"It is not too much to say that any improvement in the revenues of the railroads will immediately make itself felt in all channels of trade and that the maintenance of railroad solvency will do more than any other domestic factor to restore strength to the nation's institutions," says an editorial in the Charleston, S. C., Post.

The "career open to merit" in railway affairs is well illustrated in the case of Charles H. DeWing, a railroader for 49 consecutive years, recently promoted president of the Reading Company. In 1883, at the age of 17, DeWing began his railroad career as a rodman in the employ of the Philadelphia & Reading Railway, now the Reading Company.

There were 447 moose and 9591 deer shot in New Brunswick last year, according to figures contained in the annual report of Chief Game Warden H. H. Ritchie to the provincial Minister of Lands and Forests. There was also a very successful partridge season with a bag of 4,499 birds.

Warmer weather and generally favorable conditions point to normal development of the western wheat crop, according to the report of the agricultural department of the Canadian Pacific Railway. Virtually all of Manitoba's seed is in and Saskatchewan and Alberta seedling will be completed by the end of the third week of May.

Two famous globe-trotters, Dr. Roy Chapman Andrews, noted anthropologist, and Bob Davis, New York Sun's world-traveling correspondent, came together at Victoria recently on Canadian Pacific liner Empress of Canada, the former on his way to Peking and the latter travelling with Mrs. Davis to Honolulu.

Success attending the inaugural cruise of S.S. Princess Alice last year to northern British Columbia and Alaska has led the British Columbia Coast Steamship service to provide another special Alaska cruise with the S.S. Princess Charlotte, leaving August 9 from Vancouver. It is announced by E. F. L. Sturdee, general passenger agent, Canadian Pacific Railway.

Capital, Labor, the learned professions, diplomacy and business were all represented in the passenger list of the Canadian Pacific liner Empress of Australia on arrival at Quebec recently. The list included Sir Charles Gordon, president of the Bank of Montreal; Tom Moore, president of the Trades and Labor Congress of Canada; F. E. Meredith, K.C., Dr. Moser, consul-general for Czechoslovakia, and Colonel Berulo Barre, Canadian Government Trade Commissioner in Paris.

Residents of Maritime Provinces will have a fine opportunity of visiting Montreal's great Naval and Military Tournament, May 27-29, through a special low rate Canadian Pacific coach excursion leaving Saint John, Fredericton, Woodstock, St. Stephen and St. Andrews May 27. Similar excursions over the same week-end are being operated by the railway from Vermont, and the Sudbury, Ontario, areas. (843)

THIS IS SERVICE PLUS

Through the sympathy of a railway officer one youth was saved heartbreaks recently, as he left Winnipeg bound for the funeral of his father in a small Saskatchewan town. Advised of his father's passing through a wire from his mother, the youth, who was in Fort William, had sufficient funds to entrain for Winnipeg. He landed here broke. In his misery, he turned to the railway and through the medium of the telephone directory got in touch with the Vice-President's of-

BOUNTY ON SKUNKS

Every rose has its thorn and every skunk his problems, particularly on Prince Edward Island since they have put a bounty on skunk sprouts. Time was when Nature's prize atomizer was induced to migrate to the Garden of the Gulf, this portion of Canada being as free of skunks as Ireland is supposed to be of snakes, and was carefully tended and fed, in return for which he was expected to yield up his hide to be turned into fur with high sounding names. The Islanders, past master of the art of fur-farming, having originated the black fox farming industry, on learning that the skunk had assets as well as liabilities, got every skunk they could lay their hands on and put them in pens surrounded with wire netting, where they were expected to do their stuff in the way of multiplying. In addition to being tended and fed, veterinary experts worked on the problem of keeping them healthy and plentiful. Then the depression hit the skunk hide market and one fine morning Johnny Skunk found the door of his pen wide open and the great outdoors inviting him to roam. In other words the skunk had become a problem, so that seemed to be the easiest way out. But the Islanders failed to reckon with Johnny Skunk's propagating productivity. In fact, so well did he profit by his training and carry on, that certain portions of the Island province are overrun with his kind, so much so that the authorities have had to put a bounty on his snout and there is mourning in many a chicken roost.

GRANT FLEMING, M.D., ASSOCIATE SECRETARY

UNDULANT FEVER

Undulant Fever is a comparatively new disease. It is new only in the sense that it is now recognized for what it is. The inhabitants of the island of Malta suffered for years from a disease known as Malta fever; this disease was thought to be limited to that island. It was discovered some years ago that this disease was spread by their regular milk supply which came from goats.

Contagious abortion is unfortunately far from being uncommon in the herds of Canada. The disease germ which causes abortion is the same germ which, when it gains entrance into the human body, causes undulant fever. There are several varieties of this germ, close relations as it were, one variety prefers to live in the cow, another in goats and still another in hogs. So it is that the germ responsible for a particular disease on the island of Malta on which is spread by the milk from goats is much the same as the germ causing contagious abortion in animals in our country and responsible for undulant fever in man.

Undulant fever is contracted by man either through the use of raw milk from infected animals or by contact with infected animals. By infected animals, we mean animals which have the germ in their bodies.

Since the disease was recognized in this country, a number of cases have been reported. The disease varies in its severity. There is fever, headache, loss of appetite, weakness and either constipation or diarrhoea. It resembles typhoid fever. There are certain laboratory tests which may be made; these tests are of great assistance to the doctor in making the diagnosis.

In this, as in the consideration of other diseases, when we know the cause and how the disease is spread, we naturally ask how it may be prevented. The answer to the question can be definite.

The germ is in the milk. Pasteurization destroys the germ. Milk which is pasteurized is safe — only milk which is pasteurized is safe and if all milk used were pasteurized it would prevent all the undulant fever which is now spread by milk.

Those who work with animals or handle meat should know that the disease may be contracted by contact with infected animals. The wearing of gloves, the prompt and proper attention given to breaks in the skin, the thorough washing of hands are the measures of self-protection which such workers should use regularly in their own interests.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

WHERE THE "MERIT" SYSTEM ALWAYS WORKS

(Experimental Farms Note)

Take a drive into the country a little later in the season and note the different kinds of crops being grown in the farm fields. Some of these will produce grain while others are primarily for hay and pasture. Of these latter, only rarely will crops be found other than sweet clover, we turnip grass, and brome grass.

It must seem curious to the average person that one can count on the fingers of two hands the number of important crops that are grown to any extent as feed for live stock, while as a matter of fact, there are actually thousands of distinct different kinds of grasses and legumes growing wild. Surely some of these plants which grow naturally should be equally as good or better than those which now occupy the fields.

Undoubtedly there are still valuable discoveries to be made but before these can qualify as field crops they must pass a very vigorous test with respect to several important qualifications. The truth is that exceedingly few wild plants can succeed as cultivated crops. Many have been called but few chosen. This is a case where the "merit system" works perfectly.

Before a hay or pasture crop can ever become widely used it must be able to produce a satisfactory yield of hay or pasture and plenty of good feed; it must have good feeding quality and be able to resist disease and

A network of highways is to be built in Spain.

It is estimated that there are about 500 known deposits of gold in Japan proper.

There were 1,965 suicides in Paris, France, last year, as compared with 1,804 in 1930.

In an area of about 54,200 square miles Czechoslovakia has a population of 14,600,000.

Pope Plus XI, who enjoys good health in his 75th year, has given up smoking and drinking wine.

The Swedish Tourist Association, whose slogan is "Know Your Own Country," has nearly 150,000 members.

According to a survey by the municipal council of Paris, France, this city is valued at \$8,320,000,000.

The only legal games of chance permitted in Madrid, Spain, now are the lottery, horse races and direct bets on the results of a "jal-nai" game.

Don Niceto Alcalá-Zamora, president of the Spanish republic, prefers living in his own home, rather than occupying the national palace, former residence of the Bourbon kings of Spain.

Power was recently turned on in what is intended to be the world's largest hydro-electric plant at Dneprostroy, in Russia. When completed the plant will have a generating capacity of 756,000 horsepower, with an annual power production of 2,500,000,000 kilowatt hours.

Spain plans to preserve her art treasures, which in artistic wealth are reckoned as second only to Italy's. The government is now completing a code of laws to provide for the protection of the nation's artistic treasures. This code will co-ordinate a series of provisional decrees which have forbidden the sale or exportation of art objects and antiques.

News Notes

Because he was jailed for biting his father, Wilford Boulanger, 21, of Montreal went on a hunger strike dying at the end of eleven days. The coroner returned a verdict of death from natural causes.

The couple were married and traveled to the lakes for their honeymoon. As soon as they arrived they took a boat out upon the lake.

The following morning the brides mother got a post card, which read "Arrived safely. Grand row before supper."

"My!" she muttered, "I didn't think they'd begin quarrelling so soon."

compete with weeds. It must also be winter-hardy, drought resistant in some areas, and able to mature seed in our comparatively short growing season. Not only do crops differ in these respects but some varieties of the same crop are much more satisfactory than others.

It is clear that accurate knowledge is required to enable farmers to decide what to grow and how it should be grown. This need is being supplied by the Dominion Experimental Farms throughout Canada which are able to give this service by virtue of their excellent facilities and wide experience with farm requirements and varieties of field crops. Plant breeders are always on the lookout for valuable new plants and occasionally a discovery is made, as for example Crested Wheat grass in the Prairie Provinces and Reed Canary grass for certain conditions in Eastern Canada. The standard crops also such as sweet clover, western rye grass and brome grass are being improved by selecting, testing and multiplying the seed from individual plants of special merit.

NOTICE

Re Beginner Children in Public
School 1932

The following regulations must be observed fully by parents who wish to start children to School in Grade I this year.

1. The child must be SIX YEARS OLD on or before OCTOBER 15th, 1932.
2. The application for registration MUST BE WRITTEN and sent ON OR BEFORE JULY 1st, to PAUL DAHL, Sec. Treas., of Raymond School District, or to J. O. HICKEN, Principal of the Public School. BIRTH CERTIFICATE must accompany the application. (Church or Provincial certificates recognized.)
3. The child must be enrolled in School on or before SEPTEMBER 12th, 1932.

Raymond School Board.

AARONIC PRIESTHOOD PROGRAM

(Crowded out of Last Issue)

The Sunday evening meeting in the Raymond Second Ward was under the direction of the Aaronic Priesthood, and a very enjoyable and interesting program was carried out. Following the opening exercises and the administration of the Sacrament under the direction of the Bishopric, the time was turned over to the teenage boys for the program, and Fred Romeril Jr., conducted the meeting as follows:

Lyle Piepgrass offered prayer at the beginning of the meeting. "Restoration of the Aaronic Priesthood in Latter-Days"—Sidney Smith Retold Story—Jack Coombs of the Raymond 1st Ward.

"Ordination of Joseph Smith and Oliver Cowdery to the Aaronic Priest-

hood"—Devar King.

Vocal Solo "One Hundred Years"—Bishop J. H. Walker.

Cleon Roltson, one of the Supervisors spoke on the subject of the day, and told of the magnitude and responsibility of holding Priesthood.

Four boys sang "I'll Go Where You Want Me to Go."

Bishop Walker spoke of the First Vision of the Prophet Joseph Smith, and of the power of the Priesthood when properly exercised.

Benediction—Merrill Palmer.

All members of the Aaronic Priesthood Quorums were seated on the stand, and made quite an impressive sight.

A similar program was held in the First Ward on the same evening, the boys there taking the lead in the exercises of the evening.

WITH THE TRAIL RIDERS

East is East and West is West, but men ride wherever the sun shines and the Trail Riders of the Canadian Rockies, with a membership which girdles the globe, are creating widespread interest with their plans for their 1932 expedition from Banff to Mount Assiniboine, through some of the most beautiful country in the great mountains from which they take their name. The famous peak, with its many adjoining lakes and valleys, was the focal point of the 1927 trail ride and this year's trip, starting on July 29, will follow generally the same lines, with nights spent in camp, according to the best traditions of the Order. Ample time will be given for exploring the territory traversed, the ride occupying five days and traversing Brewster and Allenby Creeks; Assiniboine Pass and the shores of Lake Magog to the great mountain, which is the objective of the riders. Return will be made through the Valley of the Rocks; the Golden Valley; Citadel Pass and so

through Sunshine Camp to Banff once more. The pictures shown above are distinctly interesting and show Lt. Col. Phil Moore, president of the Trail Riders, and Mrs. Moore, on camel-back at the Pyramids, during the world-cruise of the Canadian Pacific liner "Empress of Britain", in strong contrast to the cowboy viewing Mount Assiniboine, where this year's trail ride leads. Inset is H. M. King, Prajadhikop of Siam, who proved an enthusiastic trail rider during his visit to Canada last summer. Below, two fair bathers are seen setting out from one of the cabins at Assiniboine Camp.
